Taking Care of Your Sterling Silver

As sterling silver is exposed to pollutants in the air, it becomes tarnished and loses its luster because of oxidation. By following a few basic guidelines, caring for sterling silver is simple – and will add to its beauty and value.

1. Before each wearing, polish your sterling silver with a polishing cloth. These cloths are treated with a special jeweler's rouge, which removes light tarnish and won't scratch your jewelry.
2. After each wearing, polish and store your sterling silver in an airtight compartment or plastic bag to minimize tarnishing.
3. Put your jewelry on last. Exposing jewelry to hair spray, cosmetics and perfume can cause spots. It also should be removed before swimming, showering, and dishwashing, or when handling bleaches, alcohols and cleansers.

If desired, you can arrange for your funeral professional to place cremated remains inside a pendant or bracelet.
Actual product may vary from photographic representation and based on manufacturer availability.

Assembling Bead Selections

Follow these simple assembly instructions to select and arrange your unique keepsake. Now you can create a personal tribute to your loved one that you'll cherish for years to come.

1. Choose a bracelet or necklace. For correct bracelet length, measure your wrist and add an extra 1" to 1½" to allow for the width of the beads.
2. Slide your beads onto the chain.
3. A gripper bead is included with the purchase of each bracelet and can be used to keep the beads from sliding. These beads have a rubber gasket that fits snugly to the bracelet and can easily be moved where desired.
4. Arrange your beads any way you want. The variations are endless.
